ELSEVIER

Sensors and Actuators B 39 (1997) 461–468

SENSORS AND ACTUATORS B CHEMICAL

Subject Index of Volumes B 38–39

Absorption
monitoring of O_2 and NO_2 using tunable diode lasers in the near-infrared region, **39**, 283
Absorption spectroscopy
optical sensing of hydrocarbons in air or in water using UV absorption in the evanescent field of fibers, **38**, 150
Acidochromism
synthesis and structure–property relationships of amphiphilic acidochromic hydroxystilbazolium dyes, **39**, 229
new near-infrared-absorbing acidochromic dyes and their application in sensor techniques, **39**, 395
Affinity fluorescence assay
a homogeneous affinity fluorescence assay system for galactose monitoring, **38**, 171
African Swine Fever
optical immunosensor to detect African Swine Fever virus and antibodies, **39**, 448
Ammonia
photon-counting optical-fiber sensor for the detection of ammonia in neurochemical applications, **38**, 183
Amperometric sensors
biosensor properties of glucose oxidase immobilized within SiO_2 gels, **39**, 222
Analogs
modified bacteriorhodopsins as a basis for new optical devices, **39**, 218
Antibody array
affinity characterization of monoclonal and recombinant antibodies for multianalyte detection with an optical transducer, **39**, 432
Artificial neural networks
extending the range of a fibre-optic relative-humidity sensor, **39**, 272
Aryldiazirin
bioengineering of silicon nitride, **38**, 38
ATR measurements
ion- and substrate-selective optode membranes and optical detection modes, **38**, 68

Bacteriorhodopsin
modified bacteriorhodopsins as a basis for new optical devices, **39**, 218
Biochemical sensors
waveguide coupling gratings for high-sensitivity biochemical sensors, **39**, 360
Bioengineering
bioengineering of silicon nitride, **38**, 38
Bioprocess monitoring
ion- and substrate-selective optode membranes and optical detection modes, **38**, 68
Biosensors
miniature integrated optical modules for chemical and biochemical sensing, **38**, 13
real-time measurement of nucleic-acid hybridization using evanescent-wave sensors: steps towards the genosensor, **38**, 78
novel bioaffinity sensors for trace analysis based on luminescence excitation by planar waveguides, **38**, 88
synthesis of a surface-active polyamic acid with pendant biological linker molecule for specific immobilization of antibodies, **39**, 261
difference interferometer with new phase-measurement method as integrated-optical refractometer, humidity sensor and biosensor, **39**, 316
development of a surface plasmon resonance sensor for commercial applications, **39**, 375
BME-44
development of a fluorescent optical potassium-selective ion sensor with ratiometric response for intracellular applications, **38**, 8
Breath-gas analysis
fast optochemical sensor for continuous monitoring of oxygen in breath-gas analysis, **38**, 141

Capillary sectorial fibers
improvement of the sectorial fiber for evanescent-wave sensing, **39**, 334
Capillary waveguide optrodes
luminescence lifetime-based sensing: new materials, new devices, **38**, 96
lifetime-based capillary waveguide sensor instrumentation, **39**, 300
Capnography
breath-by-breath measurement of carbon dioxide using a plastic film optical sensor, **39**, 419
Carbocyanines
fluorescence-based sensor membrane for mercury(II) detection, **39**, 246
Carbon dioxide
breath-by-breath measurement of carbon dioxide using a plastic film optical sensor, **39**, 419
Carbon dioxide sensors
development of an optoacoustic sensor module for pH and/or CO_2 determination in aqueous solutions, **39**, 443
Chemical and biochemical sensing
recent developments in optical transducers for chemical or biochemical applications, **38**, 1
Chemical enhancers
enhanced luminescent response of a fibre-optic sensor for H_2O_2 by a high-salt-concentration medium, **39**, 189
Chemical sensors
miniature integrated optical modules for chemical and biochemical sensing, **38**, 13
the development of optical chemical sensors for the detection of volatile compounds from spoiled hams, **39**, 390
Chemiluminescence
enhanced luminescent response of a fibre-optic sensor for H_2O_2 by a high-salt-concentration medium, **39**, 189
an enzyme-modified chemiluminescence detector for hydrogen peroxide and oxidase substrates, **39**, 291
Chip-based optical sensors
advances in miniature optical waveguide sensors, **38**, 176

Elsevier Science S.A.

Chloride ions
studies on quenching of fluorescence of reagents in aqueous solution leading to an optical chloride-ion sensor, **39**, 330
Chlorinated hydrocarbons
towards a remote IR fiber-optic sensor system for the determination of chlorinated hydrocarbons in water, **38**, 83
Chlorine
smart-sensor approach for a fibre-optic-based residual chlorine monitor, **39**, 380
Chlorine gas sensors
immobilization of ruthenium tris-bipyridyl complex for chlorine gas detection, **39**, 195
Cholinesterase
sol–gel cholinesterase biosensor for organophosphorus pesticide fluorimetric analysis, **39**, 426
Chromate sensors
sol–gel-derived optical coatings for determination of chromate, **39**, 235
Chromoionophores
dyes for use in integrated optical sensors, **39**, 202
Colour-recognition devices
modified bacteriorhodopsins as a basis for new optical devices, **39**, 218
3×3 Couplers
integrated optical Mach–Zehnder interferometers as simazine immunoprobes, **39**, 277
Covalent bonding
a comparison of immobilization sol–gel methods for an optical chemical hydrazine sensor, **38**, 154
Covalent immobilization
the bidiffractive grating coupler: application to immunosensing, **39**, 256
Cyanine
a fibre-optic immunosensor for 2,4-dichlorophenoxyacetic acid detection, **39**, 353
Cyclic voltammetry
guest–host interactions with immobilized cyclodextrins, **38**, 58
Cyclodextrin
guest–host interactions with immobilized cyclodextrins, **38**, 58

D-fibre sensors
prospects for fibre-optic evanescent-field gas sensors using absorption in the near-infrared, **38**, 42
Diagnosis
optical immunosensor to detect African Swine Fever virus and antibodies, **39**, 448
2,4-Dichlorophenoxyacetic acid
a fibre-optic immunosensor for 2,4-dichlorophenoxyacetic acid detection, **39**, 353
Differential mobility particle sizer (DMPS)
on-line and in situ detection of lead in ultrafine aerosols by laser-excited atomic fluorescence spectroscopy, **39**, 344
Differential refractometry
differential refractometry by an integrated-optical Young interferometer, **39**, 266
Diffusion
silicon-microfabricated diffusion-based optical chemical sensor, **39**, 452
Diluted blood plasma
ion- and substrate-selective optode membranes and optical detection modes, **38**, 68
Dimethyl disulphide
the development of optical chemical sensors for the detection of volatile compounds from spoiled hams, **39**, 390
2,4-Dinitrosoresorcinol
the operational parameters of a new fibre-optic sensor for ferric ions in aqueous media, **39**, 386
Diodes
monitoring of O_2 and NO_2 using tunable diode lasers in the near-infrared region, **39**, 283
Distal phase
optical immunosensor to detect African Swine Fever virus and antibodies, **39**, 448
DNA
real-time measurement of nucleic-acid hybridization using evanescent-wave sensors: steps towards the genosensor, **38**, 78
Dry-cured hams
the development of optical chemical sensors for the detection of volatile compounds from spoiled hams, **39**, 390

Electro-optics
guest–host interactions with immobilized cyclodextrins, **38**, 58
Electro-osmosis
an electro-osmotic flow system with integrated planar optical waveguide sensing, **39**, 212
Environmental monitoring
optical sensing of hydrocarbons in air or in water using UV absorption in the evanescent field of fibers, **38**, 150
environmental immunoassay for the explosive RDX using a fluorescent dye-labeled antigen and the continuous-flow immunosensor, **39**, 411
Enzyme immobilization
biosensor properties of glucose oxidase immobilized within SiO_2 gels, **39**, 222
Ethanol-selective optode membranes
ion- and substrate-selective optode membranes and optical detection modes, **38**, 68
Evanescent field
optical sensing of hydrocarbons in air or in water using UV absorption in the evanescent field of fibers, **38**, 150
optimizing the modulation for evanescent-wave analysis with laser diodes (EWALD) for monitoring chlorinated hydrocarbons in water, **38**, 163
an electro-osmotic flow system with integrated planar optical waveguide sensing, **39**, 212
Evanescent-field detection
channel waveguide mode beat interferometer, **39**, 310
Evanescent-field sensors
prospects for fibre-optic evanescent-field gas sensors using absorption in the near-infrared, **38**, 42
replicated Mach–Zehnder interferometers with focusing grating couplers for sensing applications, **39**, 295
Evanescent-wave interferometers
a GaAs/AlGaAs-based refractometer platform for integrated optical sensing applications, **39**, 324
Evanescent-wave sensing
improvement of the sectorial fiber for evanescent-wave sensing, **39**, 334
Evanescent-wave sensors
reference pads for miniature integrated optical sensors, **38**, 116
Explosives analysis
environmental immunoassay for the explosive RDX using a fluorescent dye-labeled antigen and the continuous-flow immunosensor, **39**, 411

Ferric ion
the operational parameters of a new fibre-optic sensor for ferric ions in aqueous media, **39**, 386
Fiber evanescent-wave spectroscopy
towards a remote IR fiber-optic sensor system for the determination of chlorinated hydrocarbons in water, **38**, 83
Fiber-optic
development of a fluorescent optical potassium-selective ion sensor with ratiometric response for intracellular applications, **38**, 8

Fibers
optical sensing of hydrocarbons in air or in water using UV absorption in the evanescent field of fibers, **38**, 150
Fiber sensors
optimizing the modulation for evanescent-wave analysis with laser diodes (EWALD) for monitoring chlorinated hydrocarbons in water, **38**, 163
Fibre-optic biosensors
enhanced luminescent response of a fibre-optic sensor for H_2O_2 by a high-salt-concentration medium, **39**, 189
Fibre-optic sensors
near-infrared reagents for fibre-optic ammonia sensors, **39**, 252
improvements in a fibre-optic skin-surface sensor, **39**, 371
the operational parameters of a new fibre-optic sensor for ferric ions in aqueous media, **39**, 386
Flow rig
the development of optical chemical sensors for the detection of volatile compounds from spoiled hams, **39**, 390
Fluorescein
a homogeneous affinity fluorescence assay system for galactose monitoring, **38**, 171
Fluorescein mercuric acetate
the development of optical chemical sensors for the detection of volatile compounds from spoiled hams, **39**, 390
Fluorescence
novel bioaffinity sensors for trace analysis based on luminescence excitation by planar waveguides, **38**, 88
photon-counting optical-fiber sensor for the detection of ammonia in neurochemical applications, **38**, 183
application of potential-sensitive fluorescent dyes in anion- and cation-sensitive polymer membranes, **39**, 239
Fluorescence lifetime
luminescence lifetime-based sensing: new materials, new devices, **38**, 96
Fluorescence lifetimes
lifetime-based capillary waveguide sensor instrumentation, **39**, 300
Fluorescence lifetime sensing
a microoptode array for fine-scale measurement of oxygen distribution, **38**, 122
Fluorescence quenching
a microoptode array for fine-scale measurement of oxygen distribution, **38**, 122
studies on quenching of fluorescence of reagents in aqueous solution leading to an optical chloride-ion sensor, **39**, 330
Fluorescent lifetime imaging (FLIM)
oxygen flux fluorescence lifetime imaging, **38**, 110
Fluorimetry
sol–gel cholinesterase biosensor for organophosphorus pesticide fluorimetric analysis, **39**, 426
Fluoroalkylsiloxane
surface plasmon resonance fibre-optic sensor for gas detection, **39**, 407
Focusing grating couplers
replicated Mach–Zehnder interferometers with focusing grating couplers for sensing applications, **39**, 295
Fourier transform infrared spectroscopy
towards a remote IR fiber-optic sensor system for the determination of chlorinated hydrocarbons in water, **38**, 83
Functional NIR dyes
new near-infrared-absorbing acidochromic dyes and their application in sensor techniques, **39**, 395

Galactose sensors
a homogeneous affinity fluorescence assay system for galactose monitoring, **38**, 171
Gallium arsenide
a GaAs/AlGaAs-based refractometer platform for integrated optical sensing applications, **39**, 324
Gas detection
surface plasmon resonance fibre-optic sensor for gas detection, **39**, 407
Gases
development of organically modified polysiloxanes for coating optical fibers and their sensitivity to gases and solvents, **39**, 438
Gas monitoring
real-time monitoring of environmental methane and other gases with semiconductor lasers: a review, **38**, 136
Genosensors
real-time measurement of nucleic-acid hybridization using evanescent-wave sensors: steps towards the genosensor, **38**, 78
Glucose and lactate detection
an enzyme-modified chemiluminescence detector for hydrogen peroxide and oxidase substrates, **39**, 291
Glucose biosensors
biosensor properties of glucose oxidase immobilized within SiO_2 gels, **39**, 222
Glucose oxidase
biosensor properties of glucose oxidase immobilized within SiO_2 gels, **39**, 222
Graphite and silica pastes
an enzyme-modified chemiluminescence detector for hydrogen peroxide and oxidase substrates, **39**, 291
Grating couplers
real-time measurement of nucleic-acid hybridization using evanescent-wave sensors: steps towards the genosensor, **38**, 78
Guest–host reactions
guest–host interactions with immobilized cyclodextrins, **38**, 58

Hepatic venous oximetry
a homogeneous affinity fluorescence assay system for galactose monitoring, **38**, 171
High-salt-concentration medium
enhanced luminescent response of a fibre-optic sensor for H_2O_2 by a high-salt-concentration medium, **39**, 189
Hybridization assays
novel bioaffinity sensors for trace analysis based on luminescence excitation by planar waveguides, **38**, 88
Hydrazine sensors
a comparison of immobilization sol–gel methods for an optical chemical hydrazine sensor, **38**, 154
Hydrogen peroxide
an enzyme-modified chemiluminescence detector for hydrogen peroxide and oxidase substrates, **39**, 291

Immobilization of reagent
efficient reagent immobilization procedure for ion-sensitive optomembranes, **39**, 207
Immunoassay
a fibre-optic immunosensor for 2,4-dichlorophenoxyacetic acid detection, **39**, 353
environmental immunoassay for the explosive RDX using a fluorescent dye-labeled antigen and the continuous-flow immunosensor, **39**, 411
affinity characterization of monoclonal and recombinant antibodies for multianalyte detection with an optical transducer, **39**, 432
Immunoprobe
affinity characterization of monoclonal and recombinant antibodies for multianalyte detection with an optical transducer, **39**, 432
Immunoptodes
optical immunosensor to detect African Swine Fever virus and antibodies, **39**, 448
Immunosensors
difference interferometer with new phase-measurement method as integrated-optical refractometer, humidity sensor and biosensor, **39**, 316

a GaAs/AlGaAs-based refractometer platform for integrated optical sensing applications, **39**, 324
Infrared LEDs
mid-infrared (3–5 μm) LEDs as sources for gas and liquid sensors, **39**, 339
In situ
miniature FlowProbe™ chemical sensor, **38**, 130
Instrumentation
luminescence lifetime-based sensing: new materials, new devices, **38**, 96
Instruments
multichannel calibration technique for optical-fibre chemical sensor using artificial neural network, **39**, 365
Integrated optical immunoprobes
integrated optical Mach–Zehnder interferometers as simazine immunoprobes, **39**, 277
Integrated-optical interferometric sensor
difference interferometer with new phase-measurement method as integrated-optical refractometer, humidity sensor and biosensor, **39**, 316
Integrated-optical refractometers
difference interferometer with new phase-measurement method as integrated-optical refractometer, humidity sensor and biosensor, **39**, 316
Integrated optical sensors
miniature integrated optical modules for chemical and biochemical sensing, **38**, 13
reference pads for miniature integrated optical sensors, **38**, 116
dyes for use in integrated optical sensors, **39**, 202
Integrated optics
differential refractometry by an integrated-optical Young interferometer, **39**, 266
replicated Mach–Zehnder interferometers with focusing grating couplers for sensing applications, **39**, 295
channel waveguide mode beat interferometer, **39**, 310
a GaAs/AlGaAs-based refractometer platform for integrated optical sensing applications, **39**, 324
Interference
recent developments in optical transducers for chemical or biochemical applications, **38**, 1
Ion exchange
luminescence lifetime-based sensing: new materials, new devices, **38**, 96
Ion-selective optode membranes
ion- and substrate-selective optode membranes and optical detection modes, **38**, 68
Ion-sensitive optomembranes
efficient reagent immobilization procedure for ion-sensitive optomembranes, **39**, 207
Iron
the operational parameters of a new fibre-optic sensor for ferric ions in aqueous media, **39**, 386
Isotope analysis
real-time monitoring of environmental methane and other gases with semiconductor lasers: a review, **38**, 136

Langmuir–Blodgett technique
synthesis of a surface-active polyamic acid with pendant biological linker molecule for specific immobilization of antibodies, **39**, 261
Laser-excited atomic fluorescence (LEAF)
on-line and in situ detection of lead in ultrafine aerosols by laser-excited atomic fluorescence spectroscopy, **39**, 344
Laser-induced plasma
on-line and in situ detection of lead in ultrafine aerosols by laser-excited atomic fluorescence spectroscopy, **39**, 344
Lasers
monitoring of O_2 and NO_2 using tunable diode lasers in the near-infrared region, **39**, 283
Laser spectroscopy
optimizing the modulation for evanescent-wave analysis with laser diodes (EWALD) for monitoring chlorinated hydrocarbons in water, **38**, 163
Latex-enhanced sandwich assays
the bidiffractive grating coupler: application to immunosensing, **39**, 256
Lead
on-line and in situ detection of lead in ultrafine aerosols by laser-excited atomic fluorescence spectroscopy, **39**, 344
Leaky mode spectroscopy
optical gas sensing by evaluating ATR leaky mode spectra, **39**, 349
Lectin
a homogeneous affinity fluorescence assay system for galactose monitoring, **38**, 171
Lifetime-based sensors
lifetime-based capillary waveguide sensor instrumentation, **39**, 300
Lifetime imaging
optical measurement of oxygen and temperature in microscale: strategies and biological applications, **38**, 29
Lifetime sensing
a fibre-optic oxygen sensor for oceanography, **39**, 401
Ligand immobilization
the operational parameters of a new fibre-optic sensor for ferric ions in aqueous media, **39**, 386
Light-emitting diodes
multichannel calibration technique for optical-fibre chemical sensor using artificial neural network, **39**, 365
Liver
a homogeneous affinity fluorescence assay system for galactose monitoring, **38**, 171
Luminescence detection
novel bioaffinity sensors for trace analysis based on luminescence excitation by planar waveguides, **38**, 88
Luminescence lifetime
optical measurement of oxygen and temperature in microscale: strategies and biological applications, **38**, 29
Luminescent sensors
oxygen flux fluorescence lifetime imaging, **38**, 110
Luminol
enhanced luminescent response of a fibre-optic sensor for H_2O_2 by a high-salt-concentration medium, **39**, 189

Mach–Zehnder interferometers
integrated optical Mach–Zehnder interferometers as simazine immunoprobes, **39**, 277
replicated Mach–Zehnder interferometers with focusing grating couplers for sensing applications, **39**, 295
Mercury sensors
application of potential-sensitive fluorescent dyes in anion- and cation-sensitive polymer membranes, **39**, 239
fluorescence-based sensor membrane for mercury(II) detection, **39**, 246
Metal ions
sol–gel entrapped materials for optical sensing of solvents and metal ions, **38**, 48
Methane
real-time monitoring of environmental methane and other gases with semiconductor lasers: a review, **38**, 136
Methane sensors
prospects for fibre-optic evanescent-field gas sensors using absorption in the near-infrared, **38**, 42

Microfabrication
silicon-microfabricated diffusion-based optical chemical sensor, **39**, 452
Microoptodes
a microoptode array for fine-scale measurement of oxygen distribution, **38**, 122
Microrefractometry
recent developments in optical transducers for chemical or biochemical applications, **38**, 1
Miniature chemical and biochemical sensors
advances in miniature optical waveguide sensors, **38**, 176
Miniature sensor modules
miniature integrated optical modules for chemical and biochemical sensing, **38**, 13
Modelling
multichannel calibration technique for optical-fibre chemical sensor using artificial neural network, **39**, 365
Monolithic spectrometers
smart-sensor approach for a fibre-optic-based residual chlorine monitor, **39**, 380
Multilayer waveguides
miniature integrated optical modules for chemical and biochemical sensing, **38**, 13

Nafion–crystal violet
extending the range of a fibre-optic relative-humidity sensor, **39**, 272
Near-infrared dyes
dyes for use in integrated optical sensors, **39**, 202
Neural networks
multichannel calibration technique for optical-fibre chemical sensor using artificial neural network, **39**, 365
NIR acid–base indicators
near-infrared reagents for fibre-optic ammonia sensors, **39**, 252
NIR dyes
near-infrared reagents for fibre-optic ammonia sensors, **39**, 252
Nitrate sensors
application of potential-sensitive fluorescent dyes in anion- and cation-sensitive polymer membranes, **39**, 239
Nitrite sensors
application of potential-sensitive fluorescent dyes in anion- and cation-sensitive polymer membranes, **39**, 239
Nitroorganics
environmental immunoassay for the explosive RDX using a fluorescent dye-labeled antigen and the continuous-flow immunosensor, **39**, 411
Non-solarization fibre
UV-stabilized silica-based fibre for applications around 200 nm wavelength, **39**, 305
Nucleic acid
real-time measurement of nucleic-acid hybridization using evanescent-wave sensors: steps towards the genosensor, **38**, 78

On-chip referencing
miniature integrated optical modules for chemical and biochemical sensing, **38**, 13
Optical
miniature FlowProbe™ chemical sensor, **38**, 130
Optical chemical sensors
development of a surface plasmon resonance sensor for commercial applications, **39**, 375
silicon-microfabricated diffusion-based optical chemical sensor, **39**, 452
Optical coatings
sol–gel-derived optical coatings for determination of chromate, **39**, 235
Optical-fiber sensors
photon-counting optical-fiber sensor for the detection of ammonia in neurochemical applications, **38**, 183
Optical-fibre gas sensors
prospects for fibre-optic evanescent-field gas sensors using absorption in the near-infrared, **38**, 42
Optical fibres
extending the range of a fibre-optic relative-humidity sensor, **39**, 272
smart-sensor approach for a fibre-optic-based residual chlorine monitor, **39**, 380
surface plasmon resonance fibre-optic sensor for gas detection, **39**, 407
sol–gel cholinesterase biosensor for organophosphorus pesticide fluorimetric analysis, **39**, 426
Optical-fibre sensors
multichannel calibration technique for optical-fibre chemical sensor using artificial neural network, **39**, 365
Optical gas detection
optical gas sensing by evaluating ATR leaky mode spectra, **39**, 349
Optical humidity detection
a critical comparison of different solid supports to develop room-temperature phosphorescence sensing phases of air moisture, **38**, 103
Optical immunosensors
the bidiffractive grating coupler: application to immunosensing, **39**, 256
Optical sensing
sol–gel entrapped materials for optical sensing of solvents and metal ions, **38**, 48
Optical sensors
biosensor properties of glucose oxidase immobilized within SiO_2 gels, **39**, 222
fluorescence-based sensor membrane for mercury(II) detection, **39**, 246
a surface plasmon resonance based integrated optical sensor, **39**, 286
a GaAs/AlGaAs-based refractometer platform for integrated optical sensing applications, **39**, 324
mid-infrared (3–5 μm) LEDs as sources for gas and liquid sensors, **39**, 339
breath-by-breath measurement of carbon dioxide using a plastic film optical sensor, **39**, 419
Optical waveguides
a surface plasmon resonance based integrated optical sensor, **39**, 286
Optoacoustics
development of an optoacoustic sensor module for pH and/or CO_2 determination in aqueous solutions, **39**, 443
Optochemical sensors
fast optochemical sensor for continuous monitoring of oxygen in breath-gas analysis, **38**, 141
Optodes
development of a fluorescent optical potassium-selective ion sensor with ratiometric response for intracellular applications, **38**, 8
application of potential-sensitive fluorescent dyes in anion- and cation-sensitive polymer membranes, **39**, 239
new near-infrared-absorbing acidochromic dyes and their application in sensor techniques, **39**, 395
Opto-electronic devices
modified bacteriorhodopsins as a basis for new optical devices, **39**, 218
Optrodes
development of a fluorescent optical potassium-selective ion sensor with ratiometric response for intracellular applications, **38**, 8
an enzyme-modified chemiluminescence detector for hydrogen peroxide and oxidase substrates, **39**, 291
Organophosphorus pesticides
sol–gel cholinesterase biosensor for organophosphorus pesticide fluorimetric analysis, **39**, 426
Oriented immobilization
bioengineering of silicon nitride, **38**, 38
Oxygen
oxygen flux fluorescence lifetime imaging, **38**, 110

a homogeneous affinity fluorescence assay system for galactose monitoring, **38**, 171
Oxygen micro-optodes
optical measurement of oxygen and temperature in microscale: strategies and biological applications, **38**, 29
Oxygen microsensors
a microoptode array for fine-scale measurement of oxygen distribution, **38**, 122
Oxygen optodes
a microoptode array for fine-scale measurement of oxygen distribution, **38**, 122
a fibre-optic oxygen sensor for oceanography, **39**, 401
Oxygen sensors
fast optochemical sensor for continuous monitoring of oxygen in breath-gas analysis, **38**, 141

Pattern recognition
affinity characterization of monoclonal and recombinant antibodies for multianalyte detection with an optical transducer, **39**, 432
Peroxidase
enhanced luminescent response of a fibre-optic sensor for H_2O_2 by a high-salt-concentration medium, **39**, 189
Phase modulation
a microoptode array for fine-scale measurement of oxygen distribution, **38**, 122
Phase-resolved spectroscopy
oxygen flux fluorescence lifetime imaging, **38**, 110
pH optrodes
efficient reagent immobilization procedure for ion-sensitive optomembranes, **39**, 207
Photoacoustics
development of an optoacoustic sensor module for pH and/or CO_2 determination in aqueous solutions, **39**, 443
Photoimmobilization
bioengineering of silicon nitride, **38**, 38
Photon counting
photon-counting optical-fiber sensor for the detection of ammonia in neurochemical applications, **38**, 183
Photothermal
development of an optoacoustic sensor module for pH and/or CO_2 determination in aqueous solutions, **39**, 443
pH-sensitive membranes
development of an optoacoustic sensor module for pH and/or CO_2 determination in aqueous solutions, **39**, 443
pH sensors
development of an optoacoustic sensor module for pH and/or CO_2 determination in aqueous solutions, **39**, 443
Phthalocyanines
silicon-based surface plasmon resonance chemical sensors, **38**, 53
Physical entrapment
a comparison of immobilization sol–gel methods for an optical chemical hydrazine sensor, **38**, 154
Planar waveguides
novel bioaffinity sensors for trace analysis based on luminescence excitation by planar waveguides, **38**, 88
Plasticizers
dyes for use in integrated optical sensors, **39**, 202
Polarimetric sensors
channel waveguide mode beat interferometer, **39**, 310
Polarity probes
application of potential-sensitive fluorescent dyes in anion- and cation-sensitive polymer membranes, **39**, 239
Polyamide
synthesis of a surface-active polyamic acid with pendant biological linker molecule for specific immobilization of antibodies, **39**, 261
Polysiloxane coatings
development of organically modified polysiloxanes for coating optical fibers and their sensitivity to gases and solvents, **39**, 438
Portable sensors
environmental immunoassay for the explosive RDX using a fluorescent dye-labeled antigen and the continuous-flow immuno-sensor, **39**, 411
Potassium sensors
application of potential-sensitive fluorescent dyes in anion- and cation-sensitive polymer membranes, **39**, 239
Principal-component analysis
improvements in a fibre-optic skin-surface sensor, **39**, 371

Quantitative structure–property relationships (QSPRs)
synthesis and structure–property relationships of amphiphilic acidochromic hydroxystilbazolium dyes, **39**, 229
Quenching
a critical comparison of different solid supports to develop room-temperature phosphorescence sensing phases of air moisture, **38**, 103

RDX
environmental immunoassay for the explosive RDX using a fluorescent dye-labeled antigen and the continuous-flow immuno-sensor, **39**, 411
Reagent
miniature FlowProbe™ chemical sensor, **38**, 130
Redox titrations
efficient reagent immobilization procedure for ion-sensitive optomembranes, **39**, 207
Referencing
reference pads for miniature integrated optical sensors, **38**, 116
Reflectometry
recent developments in optical transducers for chemical or biochemical applications, **38**, 1
Refractive-index change
optical gas sensing by evaluating ATR leaky mode spectra, **39**, 349
Refractive-index changes
ion- and substrate-selective optode membranes and optical detection modes, **38**, 68
Regression analysis
improvements in a fibre-optic skin-surface sensor, **39**, 371
Relative-humidity optical sensors
extending the range of a fibre-optic relative-humidity sensor, **39**, 272
Replicated integrated optical sensors
reference pads for miniature integrated optical sensors, **38**, 116
Replication
replicated Mach–Zehnder interferometers with focusing grating couplers for sensing applications, **39**, 295
Response time
a comparison of immobilization sol–gel methods for an optical chemical hydrazine sensor, **38**, 154
Retinal
modified bacteriorhodopsins as a basis for new optical devices, **39**, 218
Rhodamine
a homogeneous affinity fluorescence assay system for galactose monitoring, **38**, 171
Room-temperature phosphorescence
a critical comparison of different solid supports to develop room-temperature phosphorescence sensing phases of air moisture, **38**, 103
Ruthenium tris-bipyridyl complex
immobilization of ruthenium tris-bipyridyl complex for chlorine gas detection, **39**, 195

Seawater
a fibre-optic oxygen sensor for oceanography, **39**, 401

Second-harmonic detection
real-time monitoring of environmental methane and other gases with semiconductor lasers: a review, **38**, 136
Sectorial fibers
improvement of the sectorial fiber for evanescent-wave sensing, **39**, 334
Self-assembled monolayers
the bidiffractive grating coupler: application to immunosensing, **39**, 256
Self-assembly
guest–host interactions with immobilized cyclodextrins, **38**, 58
Semiconductor lasers
real-time monitoring of environmental methane and other gases with semiconductor lasers: a review, **38**, 136
Sensitivity
development of organically modified polysiloxanes for coating optical fibers and their sensitivity to gases and solvents, **39**, 438
Sensor arrays
optical measurement of oxygen and temperature in microscale: strategies and biological applications, **38**, 29
Sensors
miniature FlowProbe™ chemical sensor, **38**, 130
optical sensing of hydrocarbons in air or in water using UV absorption in the evanescent field of fibers, **38**, 150
Silica fibres
UV-stabilized silica-based fibre for applications around 200 nm wavelength, **39**, 305
Silica optical fibers
development of organically modified polysiloxanes for coating optical fibers and their sensitivity to gases and solvents, **39**, 438
Silicon
silicon-based surface plasmon resonance chemical sensors, **38**, 53
silicon-microfabricated diffusion-based optical chemical sensor, **39**, 452
Silicon nitride
bioengineering of silicon nitride, **38**, 38
Silver halide
towards a remote IR fiber-optic sensor system for the determination of chlorinated hydrocarbons in water, **38**, 83
Skin
oxygen flux fluorescence lifetime imaging, **38**, 110
Skin hydration
improvements in a fibre-optic skin-surface sensor, **39**, 371
Skin-surface conditions
improvements in a fibre-optic skin-surface sensor, **39**, 371
Sol–gel composites
sol–gel entrapped materials for optical sensing of solvents and metal ions, **38**, 48
Sol–gel methods
sol–gel cholinesterase biosensor for organophosphorus pesticide fluorimetric analysis, **39**, 426
Sol–gel process
a critical comparison of different solid supports to develop room-temperature phosphorescence sensing phases of air moisture, **38**, 103
a comparison of immobilization sol–gel methods for an optical chemical hydrazine sensor, **38**, 154
Sol–gel technique
biosensor properties of glucose oxidase immobilized within SiO_2 gels, **39**, 222
sol–gel-derived optical coatings for determination of chromate, **39**, 235
Solvatochromism
synthesis and structure–property relationships of amphiphilic acidochromic hydroxystilbazolium dyes, **39**, 229
Solvents
sol–gel entrapped materials for optical sensing of solvents and metal ions, **38**, 48
development of organically modified polysiloxanes for coating optical fibers and their sensitivity to gases and solvents, **39**, 438
Spectrofluorometry
fluorescence-based sensor membrane for mercury(II) detection, **39**, 246
Spectrometers
monitoring of O_2 and NO_2 using tunable diode lasers in the near-infrared region, **39**, 283
mid-infrared (3–5 μm) LEDs as sources for gas and liquid sensors, **39**, 339
SPQ
studies on quenching of fluorescence of reagents in aqueous solution leading to an optical chloride-ion sensor, **39**, 330
Stilbazolium dyes
synthesis and structure–property relationships of amphiphilic acidochromic hydroxystilbazolium dyes, **39**, 229
Stripe waveguides
replicated Mach–Zehnder interferometers with focusing grating couplers for sensing applications, **39**, 295
Surface-enhanced Raman scattering
silicon-based surface plasmon resonance chemical sensors, **38**, 53
Surface plasmon
optical gas sensing by evaluating ATR leaky mode spectra, **39**, 349
Surface plasmon resonance (SPR)
silicon-based surface plasmon resonance chemical sensors, **38**, 53
real-time measurement of nucleic-acid hybridization using evanescent-wave sensors: steps towards the genosensor, **38**, 78
a surface plasmon resonance based integrated optical sensor, **39**, 286
development of a surface plasmon resonance sensor for commercial applications, **39**, 375
surface plasmon resonance fibre-optic sensor for gas detection, **39**, 407
Synthesis
synthesis of a surface-active polyamic acid with pendant biological linker molecule for specific immobilization of antibodies, **39**, 261

Teflon®AF coating
optical gas sensing by evaluating ATR leaky mode spectra, **39**, 349
Temperature effect
reference pads for miniature integrated optical sensors, **38**, 116
Temperature micro-optodes
optical measurement of oxygen and temperature in microscale: strategies and biological applications, **38**, 29
TiO_2 waveguides
the bidiffractive grating coupler: application to immunosensing, **39**, 256
TIRF biosensors
a fibre-optic immunosensor for 2,4-dichlorophenoxyacetic acid detection, **39**, 353
Trace analysis
novel bioaffinity sensors for trace analysis based on luminescence excitation by planar waveguides, **38**, 88
s-Triazines
affinity characterization of monoclonal and recombinant antibodies for multianalyte detection with an optical transducer, **39**, 432
TSH assays
the bidiffractive grating coupler: application to immunosensing, **39**, 256

Ultrafine aerosols
on-line and in situ detection of lead in ultrafine aerosols by laser-excited atomic fluorescence spectroscopy, **39**, 344
Ultraviolet
optical sensing of hydrocarbons in air or in water using UV absorption in the evanescent field of fibers, **38**, 150

Ultraviolet fibres
UV-stabilized silica-based fibre for applications around 200 nm wavelength, **39**, 305
Ultraviolet spectroscopy
UV-stabilized silica-based fibre for applications around 200 nm wavelength, **39**, 305
smart-sensor approach for a fibre-optic-based residual chlorine monitor, **39**, 380
Unique monitoring applications
advances in miniature optical waveguide sensors, **38**, 176

Vapour standards
the development of optical chemical sensors for the detection of volatile compounds from spoiled hams, **39**, 390

Water monitoring
optimizing the modulation for evanescent-wave analysis with laser diodes (EWALD) for monitoring chlorinated hydrocarbons in water, **38**, 163
Waveguide coupling gratings
waveguide coupling gratings for high-sensitivity biochemical sensors, **39**, 360
Waveguides
recent developments in optical transducers for chemical or biochemical applications, **38**, 1
Waveguide sensors
an electro-osmotic flow system with integrated planar optical waveguide sensing, **39**, 212
Waveguide transducers
miniature integrated optical modules for chemical and biochemical sensing, **38**, 13

Young interferometers
differential refractometry by an integrated-optical Young interferometer, **39**, 266
